

Notice of Oral *Ex Parte* Presentation

March 2, 2005

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, DC 20554

Re: In the Matter of
Unlicensed Operation in the 3650-3700 MHz, ET Docket No. 04-151;
Additional Spectrum for Unlicensed Devices Below 900 MHz and the 3
GHz Band, ET Docket No. 02-380; and
Amendment of the Commission's Rules With Regard to the 3650-3700
MHz Government Transfer Band, ET Docket No. 98-237.

Dear Ms. Dortch:

On February 28, 2005, Michael Chartier and Margaret LaBrecque of Intel met with Charles Breig, Steve Selwyn, Howard Griboff, Jennifer Gorny, and George Li of the International Bureau, and Ziad Sleem, Martin Liebman, and Chelsea Fallon of the Wireless Telecommunications Bureau.

In the course of this meeting, Mr. Chartier and Ms. LaBrecque expressed Intel's continuing concern that the 3650 to 3700 MHz spectrum, especially in the affected MSAs, should be licensed on an exclusive basis to foster efficient use of this spectrum for long range applications. They stated that the best way to foster long range, wireless broadband deployment in areas where congestion is likely is to provide the protection for QoS and business certainty afforded by exclusivity. Mr. Chartier and Ms. LaBrecque also expressed Intel's continuing opinion that etiquettes, as a means to solve contention problems inherent in unlicensed spectrum, were unworkable from both a theoretical and a practical standpoint.

Pursuant to Section 1.1206 of the Commission's Rules, 47 C.F.R. § 1.1206, a copy of this submission is being provided to each of the above parties. Please contact the undersigned with any questions in connection with this filing.

Respectfully submitted,

/s/ Marjorie J. Dickman
